FINANCE FOR INDONESIA SUMMIT 2026

Event Name	: Finance For Indonesia (FFI) Summit
Event Theme	: <i>Capital Connect: Bridging People, Powering Finance</i>
Speaker	: Ken Handersen
Date	: Sunday, September 20th 2026

Background:

The Finance For Indonesia (FFI) Summit is a conference held under Finance For Indonesia to provide in-depth insight into the finance industry and to build an advanced financial ecosystem through the integration of knowledge, experience, networks, and ambition. Through cross-generational interaction and dialogue, the FFI Summit is expected to become a collaborative forum for students through industry leaders to share perspectives and open new, more inclusive opportunities.

The overarching theme of the FFI Summit is “*Capital Connect: Bridging People, Powering Finance*”, which affirms that financial progress is driven not only by the market, but through real connections that transform capital into a force for building the financial landscape of the future while empowering the next generation.

Topic:

This panel explores how companies secure capital to grow, from venture funding through to listing on the stock exchange, as well as how current economic conditions are reshaping the fundraising landscape in Indonesia:

Session 2: Where Are We Now? Mapping Indonesia's Position in the Market Cycle

Markets move in cycles, and those who understand the rhythm of expansion, contraction, and recovery are better equipped to make decisions that outlast short-term noise. This session explores how to read market cycles, identify meaningful momentum, and maintain the mental clarity and risk discipline needed to navigate volatile conditions without losing long-term perspective.

- ***Understanding Market Cycle Theory:*** Explores the fundamentals of market cycle theory and maps where Indonesia currently sits within that cycle, laying the groundwork for understanding where it heads next.
- ***Leading Indicators and Early Signals:*** Examines the early indicators that can be used to detect a shift in the market cycle before the trend becomes obvious.
- ***Reading Market Momentum:*** Discusses how to distinguish sustainable trends from short-term noise, so investment decisions aren't driven by false signals.
- ***Volatility as a Feature, Not a Bug:*** Highlights how experienced market players view volatility as a natural part of markets rather than an anomaly to avoid, and how that perspective shapes their approach to risk.
- ***Mindset Management:*** Explores the importance of maintaining mental clarity and avoiding emotion-driven decisions amid turbulent market conditions.
- ***Practical Risk Management Frameworks:*** Closes the session with practical risk management frameworks that individual and institutional investors alike can apply when navigating market uncertainty.
