WHY *Do We Exist?*

Breaking into the finance industry is a really hard challenge for a lot of students

1. *Lack of financial learning community in Indonesia.*

Finance is hard and highly technical with very limited information due to the secretive nature of deals.

Lack of mentorships and networks for individual to start their career and knowledge.

Hard to find like-minded people due to the high barrier to enter the industry.

2. *Nature of the industry makes it hard to break-in.*

Relies heavily on referrals and connections with industry professionals.

Tons of jargons that are intimidating to someone that want to break into the industry.

Low headcount due to various bottlenecks e.g., skill-set gap, lack of industry exposure, etc.

Our Goals

To bridge Indonesia's students to high-finance careers and knowledge

“

We are on a mission to equip members with the **skills, insights and network necessary** to **excel in the finance sector**

Creating a **strong community** where members can always **grow and stay connected within the finance industry**
